### **And today's financial tip:**

#### **What is working capital?**

Working capital measures how much liquid assets a company has available to build its business. It is the difference between current assets and current liabilities. This number can be positive or negative; depending on how much debt the company is carrying. In general, companies that have a lot of working capital will be more successful since they can expand and improve their operations. Companies with negative working capital may lack the funds necessary for growth.
