### **And today's financial tip:**

#### **What is a fixed exchange rate?**

A fixed exchange rate is an arrangement where the government or central bank ties the official exchange rate to another currency. The EC Dollar, for example, is fixed at 2.7 to one US Dollar. The purpose of a fixed exchange rate system is to keep the country's currency value stable. This provides greater certainty for exporters and importers and helps to maintain low inflation, thereby providing a supportive environment for economic growth and development.
