### **And today's financial tip:**

#### **What is a bid offer spread?**

This is the difference between the selling price and the purchase price for investments. When a broker is asked what price the shares of a company is trading at in the market, he will quote two prices: the bid price is the price at which you can sell your shares, and the offer or ask price is the price at which you can buy them, the difference between both is the spread.
