And today's financial tip:

### **What's the difference between equity and debt financing?**

Equity and debt financing are both methods by which a business can raise funds. Debt financing is obtained by taking a commercial loan or selling bonds, bills or notes to investors, while equity financing is obtained by issuing shares. In the first case the business will have to repay its creditors while in the latter case the shareholders are part-owners of the company and their return is dependent on the company's future performance.
