Date 26 <sup>th</sup> January, 2012	Date 26 <sup>th</sup> January, 2012

#### REPUBLIC BANK (GRENADA) LIMITED

#### Quarterly Report (Form ECSE - Q)

#### 1. Financial Statements

Unaudited Quarterly Financial Statements are attached and include:

- (a) Condensed Balance Sheet as at December 31<sup>st</sup>, 2011 and December 31<sup>st</sup>, 2010.
- (b) Condensed Statement of Income for the three (3) months ended December 31<sup>st</sup>, 2011 and December 31<sup>st</sup>, 2010.
- (c) Condensed Statement of Cash Flows for the three (3) months ended December 31<sup>st</sup>, 2011 and December 31<sup>st</sup>, 2010.

## 2. Management Discussion and Analysis of Financial Condition and Results of Operations

For the three months ended December 31<sup>st</sup>, 2011 the Bank recorded profit after tax of \$1.666 million. This represents an increase of \$0.183 million compared to the corresponding period last year. An increase in other income due to increased commission resulting from a loan campaign as well as lower operating expenses has contributed to this increase. Liquidity in Grenada remained fairly constant between November 2010 and October 2011, with the loan to deposit ratio of all commercial banks moving from 84.22 percent to 82.63 percent and Liquid Assets/Total Deposits plus Liquid Liabilities also remaining constant with marginal downward movement from 24.63 percent to 23.78 percent. This Bank's liquidity tightened slightly with a loan to deposit ratio of 83.26 percent at December 2011 and Liquid Assets/ Total Deposits plus Liquid Liabilities at 12.91 percent.

The Bank's capital base remains strong. At December 31<sup>st</sup>, 2011, Tier 1 capital to total adjusted risk weighted assets, calculated on the basis of the Basle Committee risk based guidelines implemented by the Eastern Caribbean Central Bank was 16.4 percent and total qualifying capital to total adjusted risk weighted assets was 17.6 percent. This ratio of 16.4 percent far exceeds the 8 percent minimum established by the Basle Committee.

#### 3. Disclosure of Risk Factors

The Bank manages a variety of risks in the ordinary course of business. The major risks associated with its business are credit risk, interest rate risk, market risk, liquidity risk, currency risk and operational risk. The Bank's parent company, Republic Bank Limited, lends its support to the bank in managing these risks.

#### Credit Risk

Credit Risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long term success of the Bank. The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. The Republic Group Risk Management Unit supports the Bank in ensuring that loans and advances are made in accordance with sound banking practice, current legislation and in accordance with the applicable general policy of the Bank as laid down from time to time. The risk management function is kept from and independent of the business development aspect of operations.

The Bank uses a risk rating system which groups commercial/corporate accounts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The credit control processes emphasize early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding liability may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

As a prudent policy, loan loss provisions are set aside to cover any potential loss in respect of debts that are not performing satisfactorily. A review of these provisions is conducted quarterly in accordance with laid down guidelines and recommended provisions arising out of these reviews are submitted to the Board for approval.

#### Interest Rate and Market Risks

Interest rate risk is the exposure of interest bearing assets and liabilities to movements in interest rate. The Asset/Liability Committee reviews on a monthly basis the non-credit and non-operational risks for the Bank. The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for both assets and liabilities.

#### Liquidity Risk

Liquidity risk is defined as the risk of the Bank not having sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost. Liquidity management is designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. A substantial portion of the bank is funded with "core deposits". The Bank has access to the Inter Bank Market within the Eastern Caribbean Currency Union and Republic Group's funding to provide

additional liquidity as conditions demand. The Bank can also use its significant investments in regional Government securities for liquidity support. The Bank continually balances the need for short-term assets which have lower yields, with the need for higher asset returns.

#### Currency Risk

Currency Risk is the exposure of the Bank's financial condition to unfavourable movements in foreign currency exchange rates. In recognition of these risks the Bank has established limits for uncovered holdings in each foreign currency.

#### Operational Risk

Operational risk is inherent in all business activities and is the potential for financial or reputational loss arising from inadequate or failed internal control, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud. The Bank recognizes that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. Where appropriate some risk is transferred by the placement of adequate insurance coverage. The Bank has developed contingency arrangements to support operations in the event of disaster.

#### 4. Legal Proceedings

As at December 31<sup>st</sup>, 2011 there were certain legal proceedings outstanding against the Bank. Professional advice indicates that it is unlikely that any significant loss will arise.

#### 5. Changes in Securities and Use of Proceeds

None

#### 6. Defaults Upon Senior Securities

None

#### 7. Submission of Matters to a vote of Security Holders

None

#### 8. Other Information

None
